Placenet

Summary of Project

- Mobile application designed to streamline property management & encourage homeowners and tenants to take proactive care of their homes

GOAL

- Simplify property management and empower users to improve and maintain their properties effortlessly

Client

Kazem Namazi

- Architect based in Indianapolis
- Entrepreneur & Creator of Placenet

Mentor Feedback

- Likes what we have.
- Thinks our planned features are good for an iteration 5.
- Encouraged us to go as far as we can.

Client Feedback

- Still thinks it's good enough to demo, wants an updated apk.
- Appreciates the new reset password button.
- Likes the new UI changes after his hands-on.

Overall said he had a really positive experience working with us and wishes us good luck 🍀

Iteration 5 Features

Enhanced UI

Updated the project and document pages to be more user-friendly.

Can now also filter by property for projects and by projects for documents!

Iteration 5 Features

Enhanced UI

Updated the project and document pages to be more user-friendly.

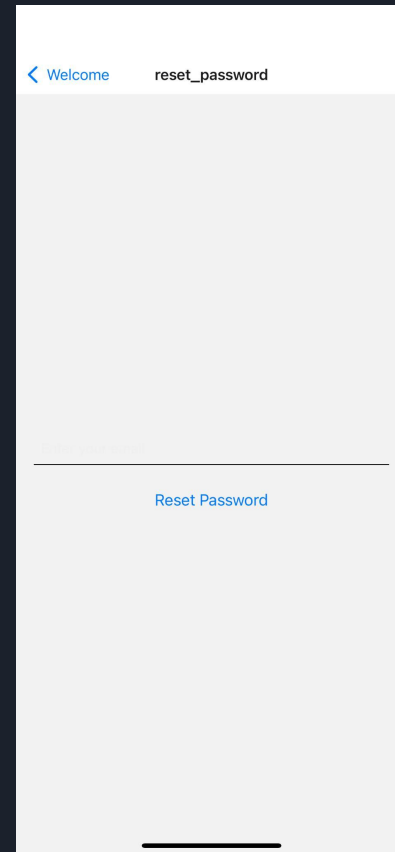

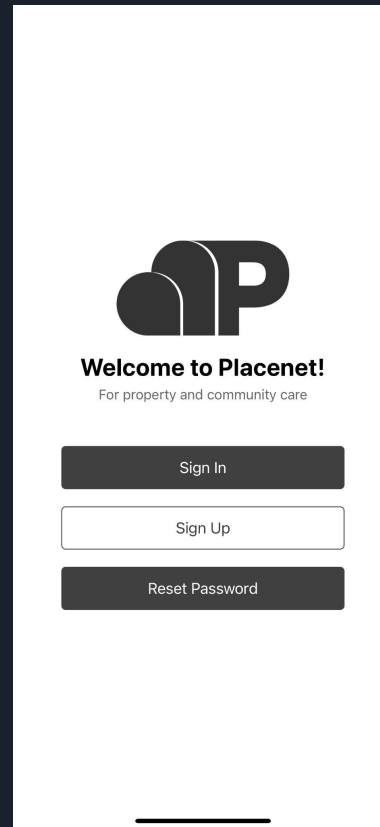

Can now also filter by property for projects and by projects for documents!

Iteration 5 Features

Reset Password

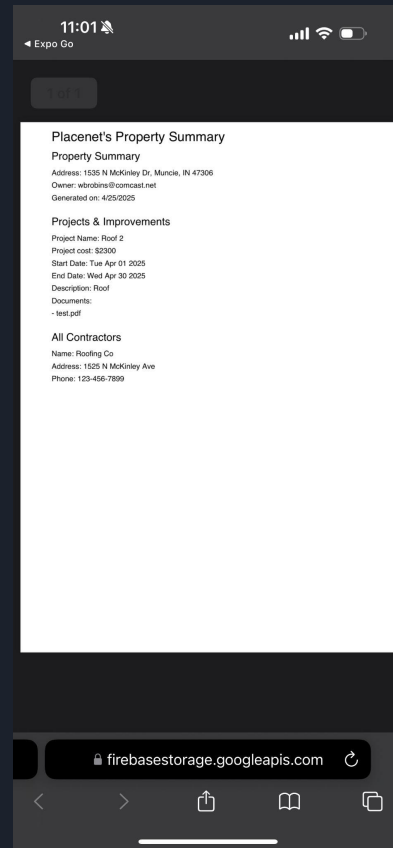

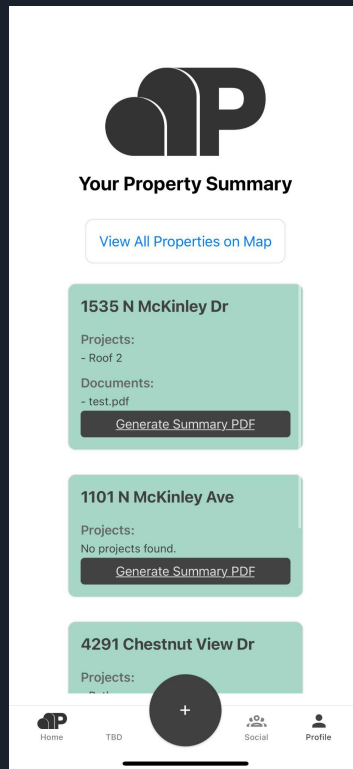

Users can now reset their passwords via email.

Iteration 5 Features

PDF Export

Users can now generate summaries of their individual properties into a PDF complete with project and document info.

Iteration 5 Features

BR1: Improve property care for homeowners and tenants by encouraging proactive care of their homes, strengthening transparent housing.

This new feature connects to the Business Requirement because it allows for users to more easily manage and see their own projects.

We believe this new PDF feature matches the business requirement since it supports the BR via letting Users share their property information amongst each other.

Teamwork

Angeles: PDF Export

Devlin: Contractors tab and Project info updates.

Ethan: Testing and circular UI menu.

Shaun: Property Summary sorting.

William: Project + Document UI overhaul and filters
